HOOF-ZINK®
E-Z LIQUID

Hit the warts, help the soil

Replacing Copper Sulfate Has Never Felt So Good

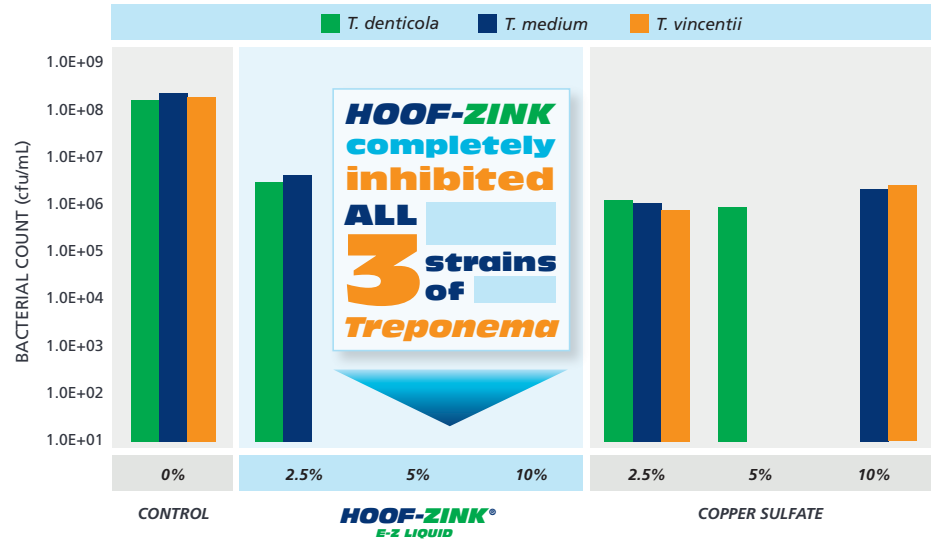

HIT THE WARTS

Hoof-Zink is more effective than copper sulfate on heel warts.

In a clinical trial, Hoof-Zink completely inhibited all three heel wart-causing strains of *Treponema* at 5 and 10% footbath solutions.

WITH HOOF-ZINK, YOU CAN COMPLETELY ELIMINATE COPPER SULFATE FROM YOUR FOOTBATH REGIMEN.

Inhibition of 3 tested strains of *Treponema*

JOHN SCHOONOVER HERDSMAN

Noblehurst Farms, Inc.
Linwood, NY
1700 Head

“We used to use copper religiously but we decided to try Hoof-Zink, and we haven’t gone back since. It mixes up easy and it’s convenient. The foot trimmer saw 5700 trimmings last year and there were only 44 cows that were listed as heel warts. That’s less than 1%. We’ve been using Hoof-Zink for 8 years here. Of all the products that we’ve used since I’ve been here, it’s the best thing out there, and you’ve gotta try it.”

HELP THE SOIL

High levels of copper sulfate can have irreversible, toxic and negative effects on plant growth.

- Stunted growth, crop death
- Toxic to micro-organisms

Hoof-Zink contains zinc chloride

- A necessary plant micronutrient—beneficial to plant growth
- Plants remove 2-10x more zinc than copper

WITH HOOF-ZINK, YOU CAN BE CONFIDENT YOU’RE NOT HARMING YOUR SOIL OR CROPS.

The easiest footbath solution you’ll ever use

- Convenient liquid goes right into solution—no need for hot water
- Will not freeze to -40°F undiluted
- Turns blue in solution
